

The orbit files

Welcome to this document where we expose the owner of orbit for hosting, possessing, distributing cheese pizza in an unblocking discord server.

What is orbit? Orbit is an unblocked game site that features your typical unblocked game site features and once had two links in total. But there is a dark secret with the owner that he doesn't want people to know about so let's dive in.

First off, orbit had a mysterious hacking recently and the site was updated to have cheese pizza in one the links that I will censor. Nobody knows who hacked the site but rumor has it that the owner of orbit did this and they're trying to censor people for talking about it. In a deleted message from the orbit discord server, ojthedeveloper, the owner of orbit, said that he will kick people from the server for talking about the cheese pizza problem and this is an example of silencing people.

Furthermore, ojthedeveloper has been caught lying to their users about the "hacking" of the website saying that he quote on quote "he didn't update the site like this, it was the hacker who hacked

He's even trying to claim that he doesn't own the domain anymore. In another discord message, he says that he doesn't own the censored domain anymore and his other known as edubase.nekoweb.org is his main link now. Here's proof of him saying something like this.

BRO

SOMEONE HACKED THE DOMAIN

omg why cant evryone understand

He's even trying to claim that he doesn't own the censored domain anymore. In another message, ojthedeve claims he doesn't own the censored domain and his other orbit link known as edubase.nekoweb.org is his main link. Here's proof of him saying something like this.

During the time of the document's existence, Cruz, the creator of the website known as cvm.rest, has come out about the situation with a quote from the website known as wilway.today. Cruz said "I am NOT apart of Orbit anymore. I deleted the domain on FreeDNS (<https://freedns.afraid.org/>), and someone TOOK that domain and now has an indefinitely loading page as I am typing this (7/11/25). Before this, the domain was just had a black background with text (unfortunately, there is no archive of "orbit.nekoweb.org") that blended into the page, basically an iframe. The one IP to the domain was GitHub Pages (185.199.111.153)". Also, ojthedeveloper has blocked cruz according to the orbit drama text file on the wilway website proving the ojthedeveloper likes to silence people despite them telling the truth.

While the owner of orbit kinda no longer owns the censored domain, the owner of orbit tried to slander me for quote on quote "scamming people" when literally he might be the one to blame for the toxicity and weirdness. Here's a screenshot of an ad for orbit in the vplaza discord's self promo channel. I had to rescreenshot it because I deleted the uncensored version for legal

mcgriddy is scamming people with an advertisement about ~~orbit~~ the domain that was aquired by Craz, one of our team members, but ~~orbit~~ got hacked by someone with CP, and mcgriddy is scamming people that it was done intentionally. go to orbit, an awesome developers community for an UBG site and LIGHTNING fast proxy -- all coded in HTML, unlike mcgriddy games, with ads and weird stuff, also our link is at <http://edubase.nekoweb.org/> isnt ready yet, its almost done.

First of all, he thinks that my site has weird stuff in it which is insane because my site is just normal and the ads claim is making me question this guy's thoughts. My site has games that might contain ads but there are many games that don't have ads anyways plus orbit has way less games than my site. This is mostly false advertising because orbit doesn't have much. He's even trying to claim that he doesn't own the domain anymore. In another discord message, he says that he doesn't own the censored domain anymore and his other known as edubase.nekoweb.org is his main link now. Here's proof of him saying something like this.

features and they say that the site is almost done but nekoweb in its free tier only brings in 500mb in storage which is not enough for many game sites. Even if ojthedev bought a monthly subscription or donation to nekoweb, nekoweb would most likely not allow proxies since proxy sites are expensive to host, especially the unblocked game site ones making this unblocked unhostable on nekoweb.

At this point Oj should not make an unblocked game site he should be held accountable for his actions.

Stay tuned for more updates
